

Level up your marketing and accelerate growth through secure data collaboration

Enhance customer profiles and execute more effective marketing campaigns by cross-referencing your user data with trusted business partners in a privacy-compliant environment.

Key Benefits

Acquire Customers

Grow your customer base through partner-led referral campaigns that target non-overlapping customers

Reduce Churn

Enrich your customer data with demographic & behavioral insights for personalized promotions that increase engagement

Generate Revenue

Improve segmentation accuracy and increase the efficacy of your campaigns to cross-sell and upsell products and services

3,001,654 overlapping customers identified
 in the past 2 weeks
 Secured by QEDIT

Key Features

Immediate value creation

Get started in minutes using a customizable template that enables you and other participants to discover overlapping customers and immediately acquire new, up-to-date and actionable insights.

Privacy-compliant technology

Safely collaborate on sensitive data to gain valuable customer intelligence, without violating data privacy regulations, and without leaking competitive company information or exposing PII.

Configurable governance

Securely manage the terms of your collaboration by predefining data fields that are relevant to your specific use case and selectively sharing new insights with your private network of trusted partners.

Automated, Real-Time Insights

Enhance the quality and accuracy of your customer data by automatically processing records and onboarding new information for ongoing, real-time segmentation and timely marketing campaigns.

What is Privacy-Enhancing Technology (PET)?

QEDIT employs robust Privacy-Enhancing Technology, leveraging advanced cryptographic techniques, to enable the analysis and sharing of insights without exposing the underlying data itself.

What leading authorities say about PET:

"crucial for the next stages of the data economy"

- The European Commission

How it Works

Launch a project

Select a workflow and define the data fields that are relevant to your collaboration

Invite partners

Set up your private network and invite partners to collaborate with you

Collaborate

Match, compute and verify encrypted data without sharing sensitive information

Monetize insights

Translate insights from your partners' data into new revenue and cost-saving opportunities
